

3 April 1953

MEMORANDUM FOR: Director, Central Intelligence

SUBJECT: Two Extremely Sensitive Research Programs

1. Approximately 6% of the TSS research and development effort lies in two highly sensitive fields in which it is not possible to conduct the work through the customary contracts for security reasons and other considerations.

2. These two sensitive fields are:

- a) Covert studies of biological and chemical warfare
- b)

3. Permission of the DCI is requested to handle work in these two fields in the manner outlined in Tab A without contracts and with reimbursement to be made against invoices properly certified by TSS.

4. All controls established in the FRC approval of the original Research Program (other than signing of a contract) would remain unchanged. Periodic financial and progress reports will be made. All documents will be retained by TSS.

5. No new funds are involved. This procedure would apply to funds previously approved for research.

6. Tab B is a memorandum to the Deputy Director (Administration) for your signature authorizing this procedure.
